

Student guide on taking Hybrid Modeled courses (Spring 2021)

What is Hybrid Modeled course?

- Professors give lectures in the assigned classroom, while online class is provided (simultaneous live streaming of the on-site lectures or post-class upload of recorded video/audio file, etc.).
- Students choose their choice of class model either to attend (and participate) online or offline. Refer to the following page for further details.
- Your choice of either taking the class online or offline will not affect your attendance or grades.

Is my class a “Hybrid Model?” How can I tell?

Go to “Course Schedule/Syllabus” menu to find out whether your course is a Hybrid model or not.
For example:

No	Course No	Class No	Course Title	Course Classification	Credit	Hour	Instructor	Class Model	Note
1	10098	01	College English	Liberal Arts Courses	3.0	3.0	Online
2	11203	01	Global Business Communication	Liberal Arts Courses	3.0	3.0	Hybrid
3	10504	01	Korean Ceramics I	Liberal Arts Courses	3.0	3.0	Offline

How to access “Course Schedule/Syllabus” (two options)

- 1 Each class has its own Class Model – Hybrid, Online only, or Offline.
- 2 For Hybrid classes, check(✓) offline if your preferred method is on-site lecture. Do *not* check when you want the online version of the lecture. Make sure to  Save before leaving this page.

Keep in Mind:

- Be sure to **save your data before each deadline**. No changes are allowed after the second (final) round.
- The number of students who can choose to participate in on-site lecture is limited on first come first serve method. It is due to the limited number of classroom capacities and to protect everyone's safety and disinfection.
- In case no one chooses to participate in on-site lecture, your hybrid model class will automatically be an "online only" one.
